## EXPERIENCE (6+ Years)

### Ingram Micro, Chennai — Software Engineer

November 2017 - PRESENT

- Handling full stack programming tasks for the development of Intelligence website which displays reports and statistics to vendors across global using Angular 9, C# and SQL. As a result, saved \$22k cost reduction spent on DNN license purchase URL: <https://intelligence.ingrammicro.com/>
- Developing new and customization of the existing features for responsive Single Page Applications which includes maps, charts and tables using HTML, CSS, and Bootstrap.
- Implementation of AES & RSA encryption techniques and JWT authentication to secure the application.
- Transforming client needs into a new product for the scraping data using C# and selenium. This reduced ad hoc request by 50% and ensured high code maintainability.
- Working as part of a high performing SCRUM team practicing Agile using Jira for CI/CD & GIT for source control.

### Cognizant, Chennai — Programmer Analyst

June 2014 - November 2017

- Experimenting with latest front-end technologies to build Expert Finder application using Angular 4, .Net core, C#, and SQL
- Replaced an existing SSRS report with a Dotnet application using C# and jQuery which improved the user experience
